INSECTICIDE

FOR WIDE AREA MOSQUITO CONTROL USE ONLY BY FEDERAL, STATE, TRIBAL, OR LOCAL GOVERNMENT OFFICIALS RESPONSIBLE FOR PUBLIC HEALTH OR VECTOR CONTROL, OR BY PERSONS CERTIFIED IN THE APPROPRIATE CATEGORY, OR OTHERWISE AUTHORIZED BY THE STATE OR TRIBAL LEAD PESTICIDE REGULATORY AGENCY TO PERFORM ADULT MOSQUITO CONTROL APPLICATIONS, OR BY PERSONS UNDER THEIR DIRECT SUPERVISION, OR AS ALLOWED BY STATE REGULATIONS FOR PERSONS TREATING PRIVATE PROPERTY.

FOR THE CONTROL OF FLIES AND MOSQUITOES IN AND AROUND POULTRY AND LIVESTOCK FACILITIES:

- Provides Quick Knockdown and Effective Control of Mosquitoes, Flies, Gnats, and Non-Biting Midges
- A FAST™ Formulation
- May be Applied Undiluted or Diluted in Water

ACTIVE INGREDIENT:

Deltamethrin .......................... 2.0%

OTHER INGREDIENTS .................................. 98.0%

TOTAL .................................................. 100.0%

Contains 0.17 pounds of Deltamethrin per gallon

EPA Reg. No. 432-1534

KEEP OUT OF REACH OF CHILDREN

FIRST AID

If swallowed

- Call a poison control center or doctor for treatment advice.
- Have person sip a glass of water if able to swallow.
- Do not induce vomiting unless told to do so by a poison control center or doctor.
- Do not give anything to an unconscious person.

If in eyes

- Hold eye open and rinse slowly and gently with water for 15-20 minutes.
- Remove contact lenses, if present, after the first 5 minutes, then continue rinsing.
- Call a poison control center or doctor for immediate treatment advice.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

USER SAFETY RECOMMENDATIONS

Users should wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet.

Users should remove clothing/PPE immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.

ENVIRONMENTAL HAZARDS

This product is extremely toxic to fresh water and estuarine fish and invertebrates. Runoff from treated areas into a body of water may be hazardous to fish and aquatic invertebrates.

Do not apply over bodies of water (lakes, rivers, permanent streams, natural ponds, commercial fish ponds, swamps, marshes, estuaries), except when necessary to target areas where adult mosquitoes are present, and weather conditions will facilitate movement of applied material away from the water in order to minimize incidental deposition into the water body. Do not contaminate water when disposing of equipment rinseate or wash waters.

When used for mosquito abatement:

This pesticide is highly toxic to bees exposed to direct treatment on blooming crops or weeds. Do not apply this product or allow drift when bees are foraging the treatment area, except when applications are made to prevent or control a threat to public health and/or animal health determined by a state, tribal or local health or vector control agency on the basis of documented evidence of disease causing agents in vector mosquitoes, or the occurrence of mosquito-borne disease in animal or human populations, or if specifically approved by the state or tribe during a natural disaster recovery effort.

When applied outdoors for fly control:

This pesticide is highly toxic to bees exposed to direct treatment on blooming crops or weeds. Do not apply this product or allow drift when bees are foraging the treatment area.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Do not apply by aircraft.

Before making the first application in a season, it is advisable to consult with the state or tribal agency with primary responsibility for pesticide regulation to determine if other regulatory requirements exist.

SHAKE OR AGITATE THOROUGHLY BEFORE USE: Product (either diluted or undiluted) must be thoroughly agitated before use. Avoid prolonged storage of excess formulation in application equipment.

NOTICE: This concentrate is for dilution with water only; it cannot be diluted in oil.

For more information, visit www.bayercropscience.com/InsecticideUserSafety or call 1-800-331-2867.

See attached labels for complete First Aid Instructions, Precautionary Statements, Directions for Use and Storage and Disposal Instructions.
APPLICATION INSTRUCTIONS

This product is recommended for application with high-back, backpack, portable, or hand-carried ULV equipment. See equipment manufacturer’s or vendor’s instructions for other equipment designed for non-thermal ULV aerial applications. The required application rate may be obtained under different conditions by altering the dilution rate of this product. The flow rate of the insecticide from the equipment and the vehicle speed. Examples are given in the following table:

<table>
<thead>
<tr>
<th>Application Rate (8% Acrinathrin)</th>
<th>Vehicle Speed (MPH)</th>
<th>Diluted</th>
<th>Undiluted</th>
<th>1:1</th>
<th>1:2</th>
<th>1:3</th>
<th>1:4</th>
</tr>
</thead>

</tbody>
</table>

Where disease vectors or a public health emergency is present, use the label high rate is recommended.

PORTABLE, BACKPACK OR HAND CARRIED ULV APPLICATION: Apply through non-thermal ULV equipment and make average calculations as a 30 foot swath. At a speed of 2 MPH (2.9 ft/sec) apply 1 ounce per minute of DeltaGard Insecticide diluted as follows: for an application rate of 0.00495% of Deltamethrin (99% acrinathrin) per acre use 1:1, for an application rate of 0.00600% of Deltamethrin per acre use 1:2, for an application rate of 0.01200% of Deltamethrin per acre use 1:3, and for an application rate of 0.01600% of Deltamethrin per acre use 1:4. Based on the above dilutionand application rate of 0.00495% of Deltamethrin per acre use 1:1, 15 applications at 0.00500% as per Akrinathrin. More frequent applications and more or less than 0.016% is not recommended. As per application per acre per minute may be made to be calculated to the desired application rate. The application equipment manufacturer or vendor is to be consulted for the proper volume for all conditions.

DROPLET SIZE DETERMINATION FOR GROUND EQUIPMENT APPLICATION: This product is recommended for ground equipment. The sprayer application equipment must be set to produce droplets between 50 and 100 microns (D v 0.9 < 100µm). For best results, apply when insects are most active and meteorological conditions are conducive to maintain optimum size and stability while drifting through the target area.

APPLICATION FOR FLY CONTROL

For the treatment of livestock and poultry facilities (e.g., cattle, dairy and livestock barns, goat barns, chicken houses, swine, etc.) use of the high label rate is recommended. For non-thermal ULV aerial applications, the required application rate may be obtained under different conditions by altering the dilution rate of this product. The flow rate of the insecticide from the equipment and the vehicle speed. Examples are given in the following table:

<table>

Storage and disposal

Storage: This product may be stored in an area that is cool and dry and out of the reach of children or other unauthorized persons. Do not store near water. When disposing of this product or rinsates, follow the procedures outlined below:

Non-refillable container. Do not reuse or refill this container. Offer for recycling, if available. Rich in storage or pressure container is not equivalent to the emptying of the container. Distilled water or alcohol must be used to flush out the contents of the container before disposal. Fill the container with one half full of water and rinse three times. Repeat this procedure two more times. Then offer for recycling or reconditioning or purchase and dispose of a sanitary landfill or incinerator, or if allowed by State and Local authorities, by burning.

Refillable container. This product may be used in refillable containers that are to be disposed of in a sanitary landfill or incineration, or if allowed by State and Local authorities, by burning. The container should be punctured or cut open by a professional. Offer for recycling, reconditioning or incineration, or if allowed by State and Local authorities, by burning.

Disposal of empty containers:

Non-refillable container. Do not reuse or refill this container. Offer for recycling, if available. After use, empty contents into a mix tank or store rinsate for later use or disposal. Do not burn. Follow the procedure outlined below:

Refillable container. Do not reuse or refill this container. Offer for recycling, if available. After use, empty contents into a mix tank or store rinsate for later use or disposal. Do not burn. Follow the procedure outlined below:

Please note: In case of spill or leakage, cover up with an absorbent material such as sand, earth, felt, or peat moss. Dispose of all chemical waste before disposal.

CONDITIONS:

This product is recommended for use in the control of adult mosquitoes within or adjacent to the treatment areas, or to areas where drift may occur over crops. The maximum number of applications per year is 15 applications at 0.0134 lb ai per acre when used in non-thermal ULV applications. The desired application rate may be obtained under different conditions by altering the dilution rate of this product. The flow rate of the insecticide from the equipment and the vehicle speed. Examples are given in the following table:
