PROFESSIONAL INSECT CONTROL ROACH KILLER BAIT GEL (Reservoir)

FOR USE IN COMMERCIAL, INDUSTRIAL AND RESIDENTIAL AREAS

ACTIVE INGREDIENT: Fipronil*: [5-Amino-1-(2,6-dichloro-4-(trifluoromethyl)phenyl)-4-(1,R,S)-(trifluoromethyl)sulfinyl]-1H-pyrazole-3-carbonitrile] .................................................. 0.01%

OTHER INGREDIENTS: ........................................................................................................ 99.99%

*CAS NO. 120068-37-3

Contains: 4 plastic reservoirs

KEEP OUT OF REACH OF CHILDREN

CAUTION: SEE BELOW FOR ADDITIONAL PRECAUTIONARY STATEMENTS

Product may stain textiles and clothing.

PRECAUTIONARY STATEMENTS:
HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Keep gel away from foods and food contact surfaces. Harmful if absorbed through skin. Causes moderate eye irritation. Avoid contact with skin, eyes and clothing. Wash thoroughly with soap and water after handling.

FIRST AID: IF ON SKIN: Wash with plenty of soap and water. Get medical attention if irritation persists. IF IN EYES: Flush eyes with plenty of water. Call a physician if irritation persists.

PHYSICAL AND CHEMICAL HAZARDS: Do not use this product in or on electrical equipment where a possibility of shock hazard exists.

STORAGE AND DISPOSAL: Do not contaminate water, food or feed by storage or disposal.

STORAGE: Store in a cool, dry area out of reach of children.

DISPOSAL: Wrap used pre-filled plastic reservoirs in several layers of newspaper and discard in trash.

If you have questions regarding the use of this product, please call 1-800-331-2867.

DIRECTIONS FOR USE:

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. MAXFORCE® FC Select Roach Bait Gel may be used as a spot or crack and crevice treatment for the indoor and outdoor (adjacent to homes & structures)/control of cockroaches in residential areas and the non-food/non-feed areas of institutional, warehousing and commercial establishments, including: warehouses, restaurants, food processing plants, supermarkets, hospitals, nursing homes, motels, hotels, schools, laboratories, computer facilities, sewers, “aircraft,” buses, boats/ships, trains, pet shops and zoos.

Non-food/non-feed areas are areas such as garbage rooms, laundries, entries, and vestibules, offices, locker rooms, machine rooms, boiler rooms, garages, mop closets and storage (after canning or bottling). This product may also be used in food/feed areas of food/feed handling establishments as outlined below.

GENERAL DIRECTIONS:

For roach gel: Application rate is dependent on level of infestation and species to be controlled. Bait can be applied as spots or be a crack in cracks and crevices. The lower application rate should be used for low to moderate infestations or re-treatments, and the higher rate for more severe infestations or where the population occurs in inaccessible areas, such as in walls. Gel placements should be at or near harborages and openings leading into voids and hollow spaces in floors, walls, ceilings, equipment legs and bases, around plumbing pipes, doors and windows, behind and under refrigerators, cabinets, sinks, closets, storage and other equipment where cockroaches hide. During follow-up visits inspect bait placements and reapply when necessary. Application of this product in food/feed areas of food/feed handling establishments other than as a crack and crevice treatment is not permitted.

Directions for loading reservoirs and operation:

1. With the teeth of the drive rod facing up, pull the drive rod all the way back. If the drive rod is initially hard to move, simply unscrew (turn counter-clockwise) the black portion of the applicator that holds the gel reservoir until the drive rod moves easily.

2. Attach a pre-fill reservoir of gel with a twist-locking motion. Remove the outlet cap and attach a dispensing tip. Break-tip Reservoir: Prior to use, break the snap-tip closed end of the gel reservoir at the scored line. After use, the reservoir may be resealed with the excessed black outlet cap. The black outlet cap is reusable.

3. Turn the knob of the drive rod so that the teeth are facing down and move it slightly forward so that the trigger mechanism will engage. Squeeze the trigger until the drive plunger seats against the piston in the gel reservoir. Gently squeeze the trigger until the gel flows out.

4. If gel continues to flow after the trigger is released, simply unscrew the portion of the bait applicator that holds the reservoir to a point where gel does not continue to flow after the trigger is released.

Directions for changing reservoirs: With the arrow on the drive rod pointing up, pull the drive rod out as far as it will go. Remove the empty reservoir, snap, and place in trash can. Reservoirs that still contain gel can be sealed with the end cap and outlet cap for future use. To attach a new reservoir follow the above directions.

Contains: 4 plastic reservoirs

NET WT 1.05 OZ (30g) each, TOTAL NET WT 4.2 OZ (120g)
