underground runways. Mounds may be indicative of the location of deeper main underground runways or in subsurface feeding tunnels. This bait may not be used above ground. Wear gloves when bait is handled. It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

CAUTION
DO NOT APPLY TALPIRID TO ANY WATERBODY, INCLUDING PALESTANT, CREEKS, STORM SEWERS OR GROUNDWATER.

WHITE ROD SIZED - 32"-36"
STAKE BELOW Watt TO NOT EXPOSE TO EXTERNAL WIND

STORAGE AND DISPOSAL

Wastes resulting from the use of this product may be placed in trash or delivered to hazardous waste disposal facility.

The presence of moles may be indicated by a network of subsurface runways in the turf or by a series of conical mounds of earth pushed up from deep burrows. Subsurface runways may be indicative of the location of deeper main underground runways or in subsurface feeding tunnels. This bait may not be used above ground. Wear gloves when bait is handled.

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

KEEPS OUT OF REACH OF CHILDREN

REMEDIES FOR POISONING

If an animal eats bait, call veterinarian or 1-877-854-2494 at once.

• Have person sip a glass of water if able to swallow.

• Do not induce vomiting unless told to do so by the poison control center.

FIRST AID

FOLLOW MANUFACTURER’S INSTRUCTIONS FOR CLEANING/MAINTAINING PPE.

NOTE TO PHYSICIAN OR VETERINARIAN

TREATMENT FOR PET POISONING

IF SWALLOWED:

Wash with plenty of soap and water.

Sequelae of consuming bait may include vomiting, diarrhea, and lethargy. Treat according to symptoms and consult veterinarian.

IF IN EYES:

If the eyes are stung by the liquid, flush with plenty of water for 15 minutes. Call a veterinarian or poison control center.

IF IN SKIN:

Remove PPE immediately after handling this product. Wash the skin area with soap and water. Keep and wash PPE separately from other laundry.

IF INHALED:

Remove PPE immediately after handling this product. Move the victim to a fresh air area. If the victim is unconscious, give artificial respiration as needed. Call a veterinarian or poison control center.

IF EXPOSED TO MIST:

Wash with soap and water. Continue with appropriate treatment for pet.

• Wash with soap and water.

• If symptoms persist, call a veterinarian or poison control center.

• Wash with soap and water.

END OF REMEDIES FOR POISONING

ESTABLISHING INITIAL ACTIVITY:

This product may only be applied at the use sites and by the application methods indicated on the label. Applications may have to be repeated to suppress mole populations if damage continues. Because moles are common in nurseries and other non-crop grassy areas to control eastern moles (Scalopus aquaticus) or
dogs and birds might be poisoned if they feed upon animals that have eaten this bait. Do not apply directly to water.

DIRECTIONS FOR USE

Subsurface runways. Be careful not to crush runways. Mark opened tunnels and revisit them 48 to 72 hours later. Runways that have had holes resealed within 72 hours should be retreated.

Runways that have had holes resealed within 72 hours should be retreated.

Five (5) to 7 days after bait application using the same procedure for determining initial activity. Return 48 to 72 hours later and retreat all active runs.

MOVE BAIT FOOD AND ADDITIONAL GRAPHICS AND TEXT.

SELECTION OF TREATMENT AREAS:

This product is extremely toxic to mammals and birds. Dogs and birds might be poisoned if they feed upon animals that have eaten this bait. Do not apply directly to water.

ENVIRONMENTAL HAZARDS

This product may only be used to control moles in manual, below-ground applications.

Keep away from children, domestic animals and pets. Do not get in eyes, on skin, or on clothing.

Keep and wash PPE separately from other laundry.

Any person who retrieves carcasses or unused bait handling are contrary to label instructions.

This product is extremely toxic to mammals and birds. Do not apply directly to water.

Do not contaminate water, food, or feed by storage or disposal.

Set in runways in a tunnel system with TALPIRID. Reapply after 48 to 72 hours, if necessary. This bait may be applied in the turf or by a series of conical mounds of earth pushed up from deep burrows. Subsurface runways may be indicative of the location of deeper main underground runways or in subsurface feeding tunnels. This bait may not be used above ground. Wear gloves when bait is handled.

Moles construct deeper tunnels that are not visible above ground. These runways are especially noticeable when the grass above them turns yellow. Conical mounds may be indicative of the location of deeper main runways. Mounds may form when dirt is pushed to the surface when moles construct runways or in subsurface feeding tunnels. This bait must be applied directly into moles' burrow systems. This bait must be used only as directed on this label. Bait must be applied directly into active runways in areas of deep subsurface tunnels. Mark opened tunnels and revisit them 48 to 72 hours later. Carefully reseal the hole, using the probe to push the bait completely into the tunnel. Use your finger, small wooden dowel or a narrow rod to puncture a hole in the top of exposed bait completely into the runway. Do not use the probe to push the bait. Drop one worm into the runway, using the rod to push any remaining bait into the runway.  Be careful not to crush runways. Mark opened runways and revisit them 48 to 72 hours later.

Deterring activities: Use the method described below to deter moles of activity in areas with deep burrow systems. Determine tunnel location. Return 48 to 72 hours later and retreat all active tunnel systems.  Repeat bait application every 5 to 10 feet of each active deep tunnel and within 5 feet of each active runway.

Environmental Hazards: This product contains corticosteroid. Use with caution. Certain individuals may have an allergic reaction to corticosteroid. Prolonged use of corticosteroid may produce symptoms of Cushing’s syndrome. This syndrome is characterized by hypertension, hyperglycemia, and osteoporosis. This product contains corticosteroid. Handling and Storage Information:
- Use in accordance with the label instructions. Do not allow exposure to direct sunlight or excessive temperature. Do not reuse or refill this container. Offer for recycling, if available.  This product may only be applied at the use sites and by the application methods indicated on this label. Buyer assumes all risk of use and/or reapplication of this product.  The product may be placed in trash or delivered to an approved waste disposal facility. Any person who retrieves carcasses or unused bait following application of this product must wear waterproof gloves.
- Do not use this product above ground.
