Terro®-PCO Liquid Ant Bait now comes as an easy-to-use, pre-filled liquid ant bait. Ants will enter, feed and return to the nest where they will pass on the Terro®-PCO Liquid Ant Bait to the rest of the colony.

1. Break pre-filled baits apart from the plastic frame.
2. Hold bait upright and cut off colored section.
3. Place baits, label side up, near ant trails or close to where ants are numerous. Place additional baits anywhere ants may enter the home. For best results, use seven baits to ensure sufficient supply for the ants.
4. Monitor regularly for activity but do not interfere with the ants or baits. Replace with additional baits when first set is depleted.
5. Once ants are controlled, replace baits every three months to keep ants from returning.

DO NOT USE in edible product areas of food handling establishments, restaurants or other areas where food is commercially prepared or processed. Do not use in serving areas while food is exposed. Avoid contamination of feed and foodstuffs. Place bait in areas inaccessible to children and pets.
