

OVI-CATCH™ MOSQUITO TRAP

WHAT IS OVI-CATCH™?

The Ovi-Catch™ Mosquito Trap is based on technology that was developed and tested in the performance of research conducted at the Centers for Disease Control and Prevention (CDC) laboratory in Puerto Rico.

“Ovi-Catch™” is a trade name for “Autocidal Gravid Ovitrap”, which is a trap that has been **designed to use mosquitoes’ breeding tendencies against them.**

Each Ovi-Catch™ mosquito trap contains:

- 5 gallon container
- Capture chamber
- Glue board

WHY IS OVI-CATCH™ DIFFERENT FROM OTHER MOSQUITO PRODUCTS?

- The Ovi-Catch™ trap is safe for families, pets and the environment.
- It is non-toxic and pesticide-free.
- Some of the most invasive mosquito species are known as “container breeders”. This means they search out containers to lay their eggs. **Ovi-Catch™ uses this natural instinct to trap them on the glue board.**
- Not only do glue boards manage mosquito populations, they also allow for monitoring of species and optimal treatments.

HOW DOES OVI-CATCH™ PROTECT YOUR PROPERTY?

- Lures egg-laying female mosquitoes
- Traps them on the Catchmaster glue board
- Eliminating 30% of egg-laying females can reduce populations by up to 80%
- Glue board helps to monitor for invasive species on your property

WHAT ARE THE EXPECTED RESULTS?

- Female mosquitoes can lay up to **150 eggs in a single batch.**
- Female mosquitoes can lay up to **6 batches of eggs** in their lifetime.
- Each female mosquito trapped **can prevent up to 1,000 future mosquitoes.**
